Interim Earnings Report

6 months ended 30th June, 2013

#### Recommendation: BUY

- Diamond Bank reported 32% YoY growth in turnover to N85.6bn for the 6 months to June 2013. PBT and PAT came in at N17.6bn and N12.6bn reflecting respective YoY growth of 14% and 27%.
- Q2 13 Gross earnings of N45.7bn were 14% above our estimates while PBT was 5% behind on higher opex and impairment charges. PAT disappointed by a wider 17% margin, reflecting 8pps higher tax rate for the quarter vs our 20% estimate.

#### Revenue recovery waxing stronger...

Diamond's ongoing recovery from a weak Q4 12 was even stronger than we envisaged with Q3 13 interest income (+7%QoQ) of N36bn surpassing our estimates by 9%. This largely reflected increase in earning asset volumes as asset yield of 11.3% was in line with our expectations. New funds were channeled into loans (+5% QoQ) and long term securities (+81% QoQ) even as Diamond drastically cut back on trading assets (-96%) QoQ). However, the main boost to revenue was from non interest sources (+58% QoQ) which were 34% above our estimate. While other sub-components showed a strong growth trend, fee & commission income (+46%)QoQwas surprisingly strong-whereas expectations for more tempered growth in light of regulatory caps on fees underpinned our more sedate

NIR growth forecast.

• Conversely, Diamond was more impacted by competitive pressures for funds than we envisaged. In contrast to our expectations that its resilient deposit mobilization channels would help Diamond lower funding costs from the Q113 peak, interest expense was flat QoQ (Q1: +33%). Thus, while further deposit growth (+4% QoQ) helped moderate annualized WACF 10bps QoQ to 3%, this was ahead of our FY 13E of 2.9%.

## ...But inefficiencies and impairments erode benefits

- Operating costs jumped 14% QoQ to N21.1 bn, exceeding our estimate by a similar margin. Personnel expenses were up 42% QoQ amid a general rise across subcomponents. Nonetheless, on stronger revenues, quarterly CIR was 3pps lower QoQ to 58%, with the 59% H1 level still in line with our FY 13 estimate.
- Even more significant was the doubling of provisions QoQ to N6.5bn in Q2 13, 61% ahead of our estimates. Having subscribed to the view that the rebound in Q1charges (after a N6.4bn writeback in Q4 12) would recur intermittently (which informed our more conservative FY 13E forecasts), we are still somewhat concerned at the magnitude of the Q2 jump and its potential implications going forward.
- The opex and provisions jump drained operating gains holding PBT and PAT flat QoQ at N8.8bn and N6.4bn respectively, with corresponding margins at 15% and 14%. For similar reasons, PBT margins were 2pps lower our estimates while the PAT margins were 4pps lower.

### Upgrade to operating forecasts offset by elevated charges

• In view of its contribution to interest income, we have revised our earning asset volumes upwards to capture the steady growth in funding base. However, similar adjustments to non-interest revenue are tempered by our view that Diamond has limited scope for trading gains having depleted its trading portfolio. Overall, our Q3 13 revenues at N47bn are 18% higher than previous but imply a modest 3% QoQ growth. The muted QoQ trend also reflects our view that recent CRR hike puts a premium on liquidity within the industry in fending off higher funding costs; Diamond's heavy weighting in HTM assets in Q2 could thus prove a

disadvantage, especially as its Eurobond plans are now on ice.

- This has also reflected in our interest expense estimates which we have revised 19% higher to match the flat quarterly level through H1 at N9.4bn. As a result our FY 13 E WACF is 40bps higher at 3.3%.
- Similarly we have revised our opex estimates 12% higher to N21bn to match the
  H1 run-rate. Nonetheless, on upward revenue revision, our FY CIR estimate is
  unchanged at 59%. We have also revised our provisions estimates 24% higher to
  match the H1 average, pending clarification from management over drivers of
  negative provisioning surprise.
- As a result of opex and provisions our PBT and PAT estimates are unchanged at N37bn and N29.4bn respectively, the latter translating to EPS of N2.03.

### Deep valuation discount still intact, preserves BUY rating

• Our fair value estimate is also unchanged at **N9.6** which implies a 42% upside potential from current price. Furthermore, current PE of 3.9x, forward PE of 3.3x and P/Bv of 0.8x remain attractive compared with respective peer averages of 6.9x, 6.3x and 1.4x. Hence, we retain a BUY rating on the stock.

#### ARM ratings and recommendations

ARM now employs a two-tier rating system which is based on systemic importance of the security under review and the deviation of our target price for the stock from current market price. We characterize systemic importance as a function of a stock's ranking among the group of top 20 stocks by NSE market capitalization over a trailing 6 month period (minimum) to the review date. We adopt a 5 point rating system for this category of stocks and a 3 point rating system for stocks outside this group. The choice of top 20 stocks arises from the consideration that this group of stocks constitutes >75% of overall market capitalization and stocks outside this group are generally less liquid and individually account for <<1% of market capitalization. For stocks in both categories, the basis for ratings subject to target price deviation is outlined below:

TOP 20		NON-TOP 20	NON-TOP 20	
Rating	Deviation	Rating	Deviation	
STRONG BUY	>20%	BUY	>20%	
OVERWEIGHT	10% — 20 %	NEUTRAL	5% — 20 %	
NEUTRAL	0% — 10 %	SELL	<5%	
UNDERWEIGHT	-5% — 0%			
SELL	<-5%			

RECOMMENDATION K	EY
Rating	Recommendation
BUY	Accumulate security to a substantial extent constrained only by portfolio diversification considerations
OVERWEIGHT	Accumulate security to an extent moderated by cognizance of its benchmark weight
	Maintain status quo for security with respect to current holding—i.e. keep if already holding and don't buy otherwise—
NEUTRAL	subject to reasonable portfolio constraints
UNDERWEIGHT	Minimise exposure to security taking cognizance of its index weighting
SELL	Sell-off security completely from portfolio
